KyphoLift; **the** safe method for “no lift” care. Elevating patients, elevating care.

Our Mission

KyphoLift revolutionizes patient throughput in Radiology, reducing “non-value” added time. Patient centered care is designed into KyphoLift for safe and optimal results.

Our goal is to reduce excess time and repeated sequences by 30%, empowering **a single technologist to deliver efficient “no-lift” care**, especially in limited-staff and on-call situations.

We focus on ensuring patient comfort by using stable platforms that keep the patient's center of gravity as close to the imaging table as possible.

KyphoLift enhances comfort, stability, and security for patients, resulting in fewer motion artifacts and easier repositioning.

By optimizing value-added time, we aim to create efficient, predictable, and compassionate outcomes while minimizing lifting liabilities for care teams.

Safety Impact

KyphoLift was designed to eliminate manual lifting, preventing the frequent “micro-injuries” associated with lifting that drive many Workman’s Compensation claims and employee burnout.

Financial Impact

KyphoLift addresses the needs of patients with limitations such as obesity, kyphosis, degenerative disk disease, etc. who often require more time than scheduled.

By increasing scan capacity during operational hours, KyphoLift transforms inefficiency into revenue.

KyphoLift Results

- Average reimbursement **increase of \$556K** per 10K exams additional revenue.
- **Reduce labor expenses by \$140K** on average per 10K exams.
- **35% increase** in MRI efficiency.

Codes & Certifications

GSA Contract: 47QSWA20D0006

Product #: KYP-A, KYP-B

TAX ID: 35-2568460

DUNS #: 08-068-2781

SAMS:WHV7NRQWYTL6

CAGE: 7YWL7

NAICS: 621512, 622110

Purchasing Details

- **VA Rate: \$6,150.00**
- No Additional or Recurring Fees
- Accept credit & purchase cards
- Small Disadvantaged Business (SBA Certified)
